

"...IS ONE OF THE MOST USEFUL PRODUCTS I HAVE RUN ACROSS IN MY 30 YEARS OF TEACHING."

Hank Johnson is a noted PGA golf professional. Voted one of Golf Magazine's top 100 teachers, he has conducted over a thousand golf clinics and given more than 10,000 golf lessons throughout his career. He has also been recently inducted into the Alabama Sports Hall of Fame for Golf. Hank Johnson has been successfully using the Power Wrist™ with his students for some time.

"The fundamental goal of effective golf practice is to repeat the desired movements correctly over and over, until they become automatic."

"The Power Wrist golf training device is one of the most useful products I have run across in my thirty years of teaching. I highly recommend it for anyone who is interested in improving the overall consistency of their game."

Hank Johnson

"I found the Power Wrist a very worthwhile training device. For me, it promotes the right wrist position throughout the swing, most importantly not allowing the left wrist to collapse at impact. It also promotes the correct arm rotation in the impact area. I would recommend it to any golfer at any level as we are all trying to square the clubface up at impact. For me, the Power Wrist is so useful because you can hit shots with it on your wrist, therefore helping to learn the correct movement quicker."

Diane Barnard, LPGA tour player

What is the Power Wrist™?

The Power Wrist™ is a new, easy-to-use self-training golf aid that teaches golfers how to acquire the proper positioning of the wrist and arm during the entire swing.

The Power Wrist™ keeps the clubface square throughout the entire swing. The pivoting device and wrist "cupping" restraint assists in developing muscle memory for lasting improvement. This encourages the hand to pivot properly relative to the forearm. The swing with a Power Wrist™ is more **powerful and accurate** due to improved hand and wrist control.

When using the Power Wrist™ during practice and leisure rounds, golfers will begin to **enjoy** the game more by keeping the ball in play longer. The golfer will learn the most **comfortable swing is also the most effective swing** and will realize improved accuracy, and added distance for **lower overall scores**.

Position of Power Wrist™ on the wrist and arm (golf glove must be worn over the Power Wrist™ when in use)

The Power Wrist is made from a patented blend of materials, designed to maintain flexibility and durability. It is lightweight, easy and convenient to use and fits neatly in a golf bag. The snap action quick release locking device snaps on or removes the Power Wrist™ in seconds.

"I've been playing golf for seven years. I love it...NOW! Last year, I was done...finished...no more frustrations, no more lost balls in the water or in the woods. When a friend showed me the Power Wrist, I said, 'what the heck is that?' He told me to put it on and try it. I did and it took him three months to get it back! It did more for my game than four teachers and three sets of clubs. Power Wrist is the best!" **Mario Santoro**, Sterling, MA

"... Within two weeks I began to see tremendous improvement in my game. I get good ball flight, hit more fairways and greens and get a lot closer to the hole. For the first time since I started golfing, I can really enjoy the game!" **B. Ashley**, St. Clair Shores, MI

"Power Wrist is the first thing I have tried that did just what it claimed it would do! My game improved by seven shots within a very short time; but what I like best, is the ease and non-cumbersome way it works. I love it! THANK YOU POWER WRIST!" **Peter Bertolino**, Clearwater, FL

Who Benefits From The Power Wrist™?

The Power Wrist adapts naturally to the biomechanical movements of the wrists and forearms during the golf swing. It is designed to allow the hands, wrists and forearm to stay in the correct position for effectiveness while **eliminating the strain that often causes golfer injuries**.

Also, most golfers, no matter what their experience or handicap, are faced with one particular obstacle at least to some degree...the slice. The difficulty occurs during the swing, when the golfer's hands and wrists move out of proper alignment. Those slight little movements can make a big difference in overall score. **The Power Wrist™ helps both amateur and experienced golfers feel the proper plane of the golf swing and consistently repeat good swings.** One of the first things golfers will notice with the Power Wrist™ is a lower score average.

Skill Level	Immediate Improvements	Improvements After Repeated Use
Beginning Golfer	Reduction in slicing and hooking.	Added distance because your clubface is square to the ball. Major improvement in chipping and putting.
Intermediate Golfer	Better control. Fading and drawing the ball.	Greater control over the swing enabling you to hit a smaller target area.
Expert Golfer	Major improvement in hitting a smaller target area.	The ability to isolate problems in your swing easier and faster than conventional methods.

The Power Wrist uses a simple, easy and natural method to develop a powerful and accurate swing. **The repetition of positive habits during practice can then be applied to a game.** The golfer will "remember" what is most comfortable and will see immediate improvement.

Using the Power Wrist is a painless way to improve the game while having fun!

The Power Wrist™ keeps the golfer's hand and wrist in the proper position throughout the entire swing.

Questions about the Power Wrist™: powerwrist@powerwrist.com

"The great thing about the Power Wrist is that it's the only golf training aid on the market that helps control full swing, chipping, short shots and putting without having to change anything. We believe so strongly in our product that if you're not completely satisfied, we'll buy it back."

Gary Goins, Inventor of the Power Wrist™
